Notes																																
Rule applied to estimate salmon-trout splits																																
1. 100% salmon 1 Dec - 31 March																																
2. EA 2019																																
3. HLH % splits estimated from proportion of trapping data, size not used due to lack of conductivity measurements																																
4. HLH % 2018																																
5. HLH 2019																																
6. EA 2018																																
* T indicates trapping
